

# WE TRANSFORM ORDINARY AMBULANCES INTO CUTTING-EDGE SMART AMBULANCES

Enabling Digital Transformation.

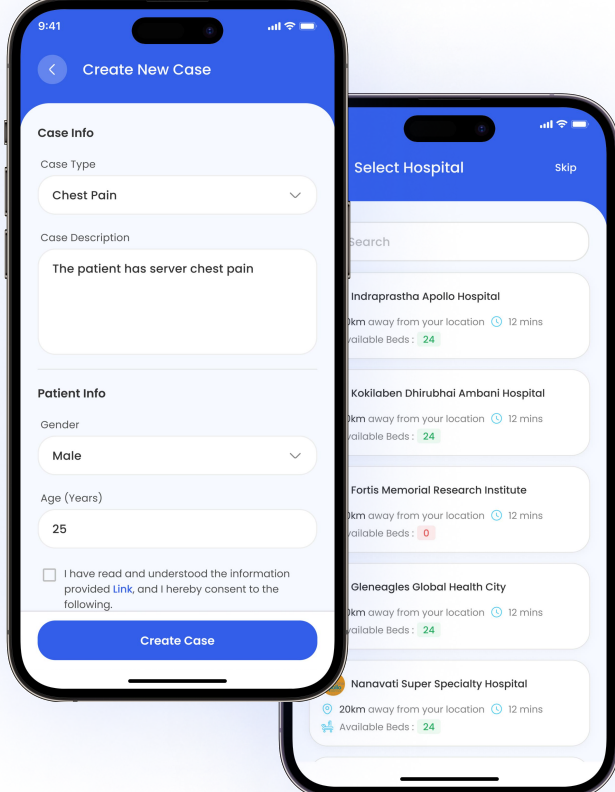

## NATIONS FIRST AI-POWERED SMART AMBULANCE

Introducing **BLU+** a one-stop communication system between ambulances & receiving hospitals. Our innovative wearable device and ML-powered mobile app transform ordinary ambulances into real-time data hubs, instantly connecting them to secure hospital web platforms in emergency wards.

## EMPOWERING THE CRITICAL CARE PATIENT TRANSIT JOURNEY

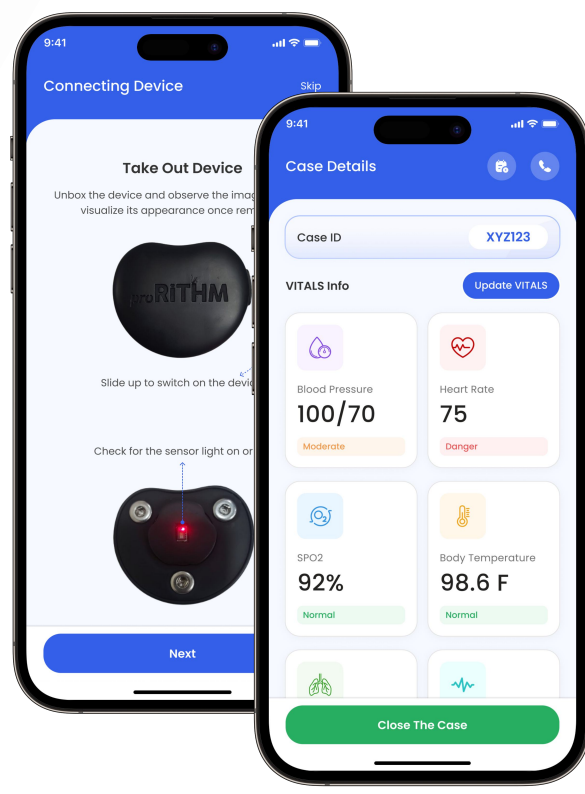

### 1. Paramedic Mobile App

- **Case Creation:** Paramedics can create cases using the BLU+ Mobile app.
- **Smart Hospital Selection Using ML:** Our Kode Blue app utilizes a Hospital Matching Algorithm to identify the nearest appropriate hospital based on patient criteria and location.

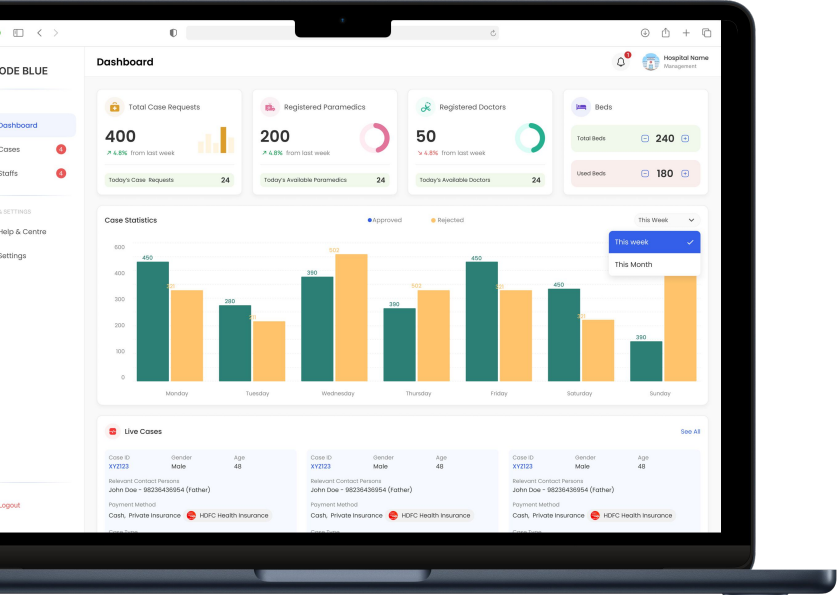

### 2. Smart Wearable for Patients Continuous Monitoring

- **Wearable Technology:** Our smart wearable device monitors critical vital signs, ensuring comprehensive patient tracking during transport.
- **Cloud Analysis:** Our advanced algorithms process the raw data from the wearable device, extracting key health indicators.

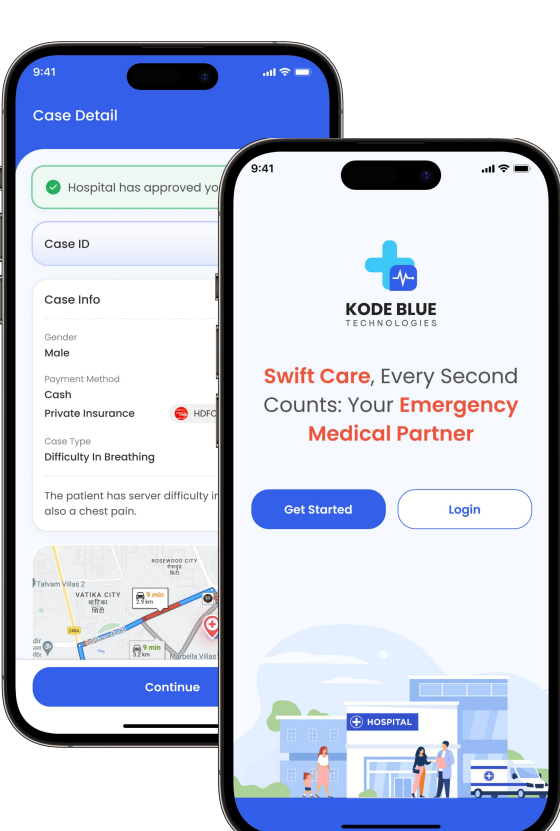

### 3. Web Platform for Hospitals

- **Hospital Access:** Vital signs are securely transmitted to hospitals via standard healthcare APIs.
- **Real-time Collaboration:** Our web application facilitates the secure exchange of critical patient information r paramedics and ER doctors, enabling timely medical intervention.

## GET READY TO EXPERIENCE THE FUTURE OF AMBULANCE CARE

**50%**  
Reduces emergency response time.

**40-15%**  
Mitigates mortality rates.

**2x**  
Increases productivity and efficiency of emergency unit.

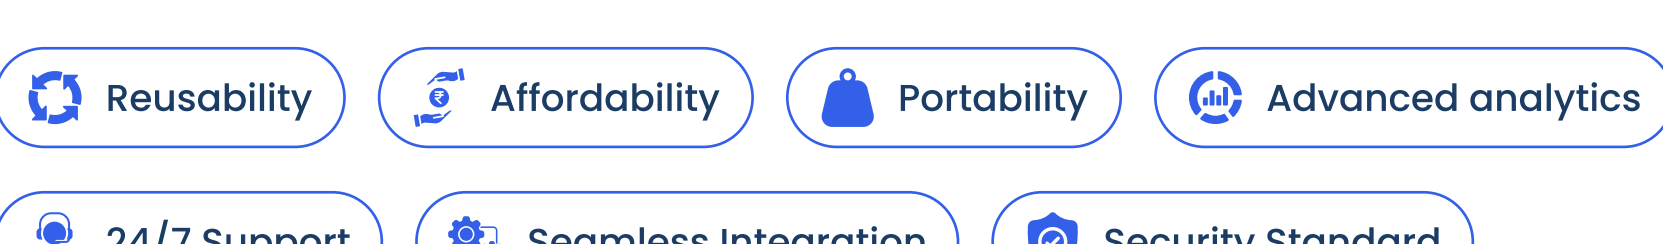

**80%**  
Enhances compliance scores through improved adherence to standards and protocols.

**NABH Policy**  
Complies with new policy requiring ambulances to have proper communication systems.

TRUSTED & BACKED BY
